Included

RF remote control ART5.4 / ART8.8
This beautiful and practical remote control has an easily readable colour LCD display and a practical navigation island which makes it easy to operate the entire system (choice of source, sound control, volume, track selection, etc.)

RM5.4/8.8

Optional

Wired wall control ART5.4 / ART8.8
These compact touch screen wall controls allow interactive operation in the zone.

RM5.4/8.8easy *
One push of the button is enough to select a different music source and to regulate the volume.

***required** interface IF001

8-way wall transmitter*
One push of the button is enough to select different sources, control the volume, or regulate the zone. The wall transmitter consists of a basic unit (410-00003) and is available in two standard colours.

white
120-76100 - cover
120-0049-11 keys

grey
121-76100 - cover
121-0049-11 keys

410-00003 (basic unit)

Thanks to the RS232 ports and Ethernet connection, we can also facilitate integration with different types of home automation systems.

ART5.4

The ART5.4 is a high-quality audio distribution system allowing you to send up to 5 different sound sources to 4 sound zones. Each zone is equipped with a powerful 2 x 20 watt RMS Class D amplifier component. In addition to the two FM tuners on board, the ART5.4 can also process one digital audio streams. This may originate from Internet radio, an external hard drive, a USB source device and/or an SD memory card. An additional two external audio sources may also be connected. The system offers wireless bi-directional communication, which for example means that you can see the information on your intelligent remote control for the music that is being played in a certain zone: track details for an mp3 file, RDS information or a CD track. The unit comes standard with 1 remote control.

description	audio distribution system for 4 zones
sources	Class D amplifier components - 2 x 20 W RMS per zone
operation	master zone for connection to external (surround) amplifier
	2 x built-in FM tuner with RDS info
	1 x digital audio players (USB slot, SD, Shared Media or Internet radio)
	2 x external audio sourcers with IR control (e.g., iPod docking)
	built-in bi-directional RF transceiver (2.4 GHz Zigbee)
	wireless control option (max. 16 remote controls)
	bus system for wired control (KNX cable)
	Ethernet port (for set-up as well as control)
various features	2 x serial RS232 port (integration with home automation applications...)
	5 x configurable IR ports
	4 x trigger inputs
	1 x trigger outputs
	future-proof via software updates (USB)
	2 "party" modes (same music played in several zones)
	event planner (via configuration menu; based on web interface)
	power supply 110 V - 230 V
weight	6 kg
dim. mm	115 x 436 x 415
